# IDEOLOGY AND MYTHS

## **Ideology often refers to myths**

- Obvious inspiration of Nazi propaganda by Antique Greece
- The same with Communist architecture

## **Myths are useful as it works in the same pattern as ideology**

- Intention to include the whole world and answer any question
- It revolves around belief rather than facts

- Both ideology and mythology not only define a certain art, but human conduct in any way
- For example not only does it affect us by watching an ideological opera, but we conduct under its spell all the time (e.g. brushing our teeth)
- Therefore any building is erected under the spell of ideology
