

# DISCUSS THE IMPACT OF ARCHITECTURE ON THE INDIVIDUAL

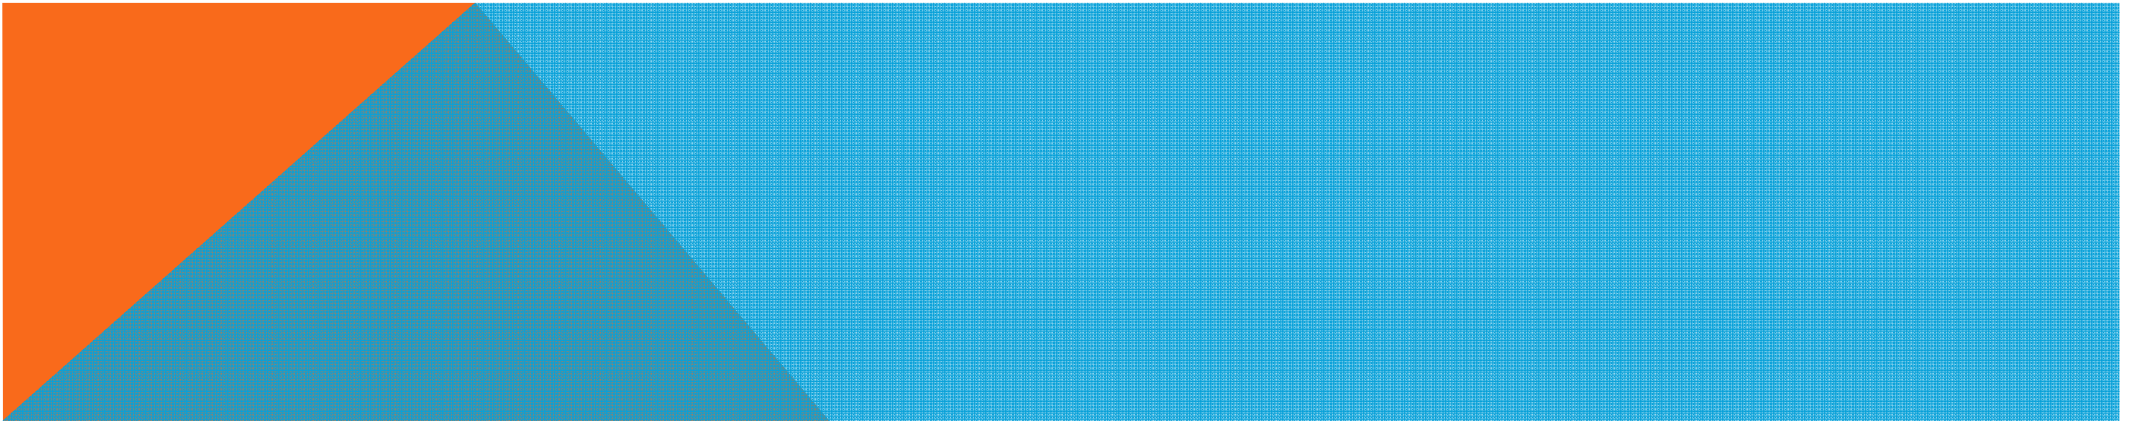

BENEDIKT STRANAK, MELINA TOUMPAIARI

# CSOB

**The CSOB building focuses on the openness of the space**

**This corresponds with its PR:**

- Openness towards its clients
- Funding concerts and music festivals etc.

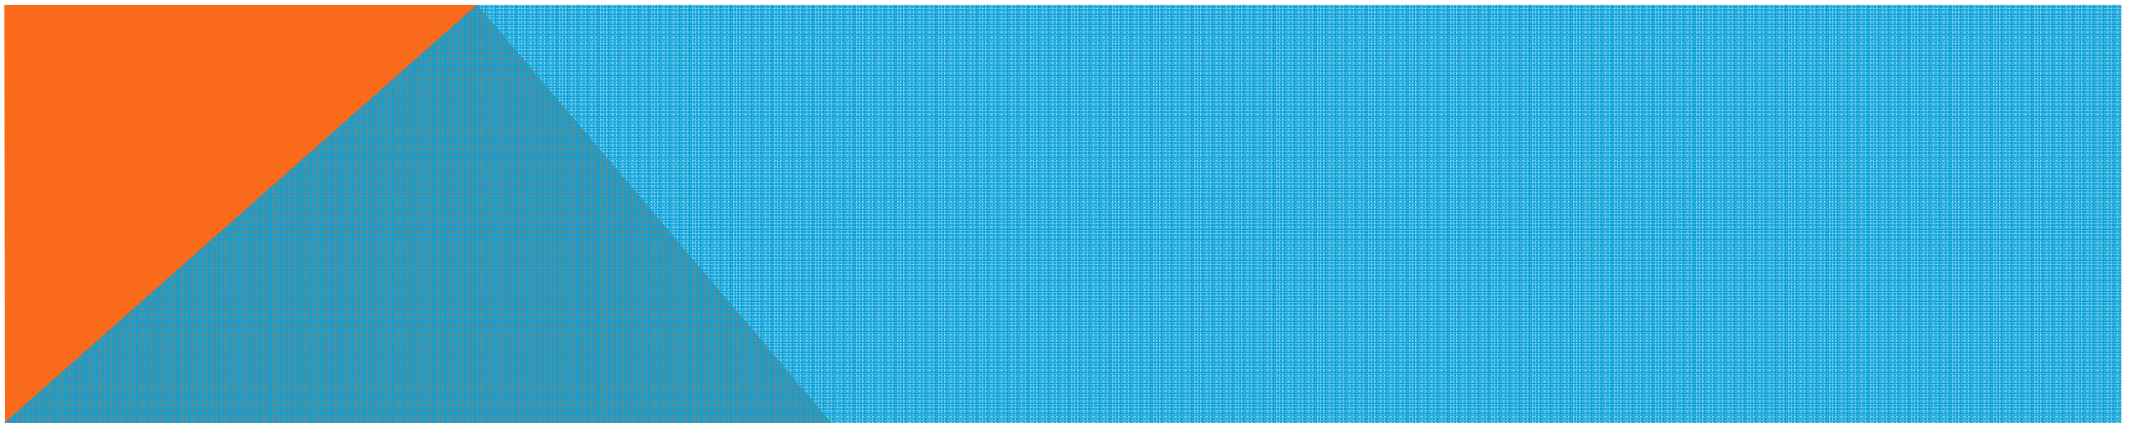

**All the buildings we have visited are highly functional**

**Mostly we have discussed the suitability of the space for work**

**Thus we concentrated on the people *inside***

**Let us focus on the way these buildings are perceived by people *outside*  
because these buildings have a representative function as well**

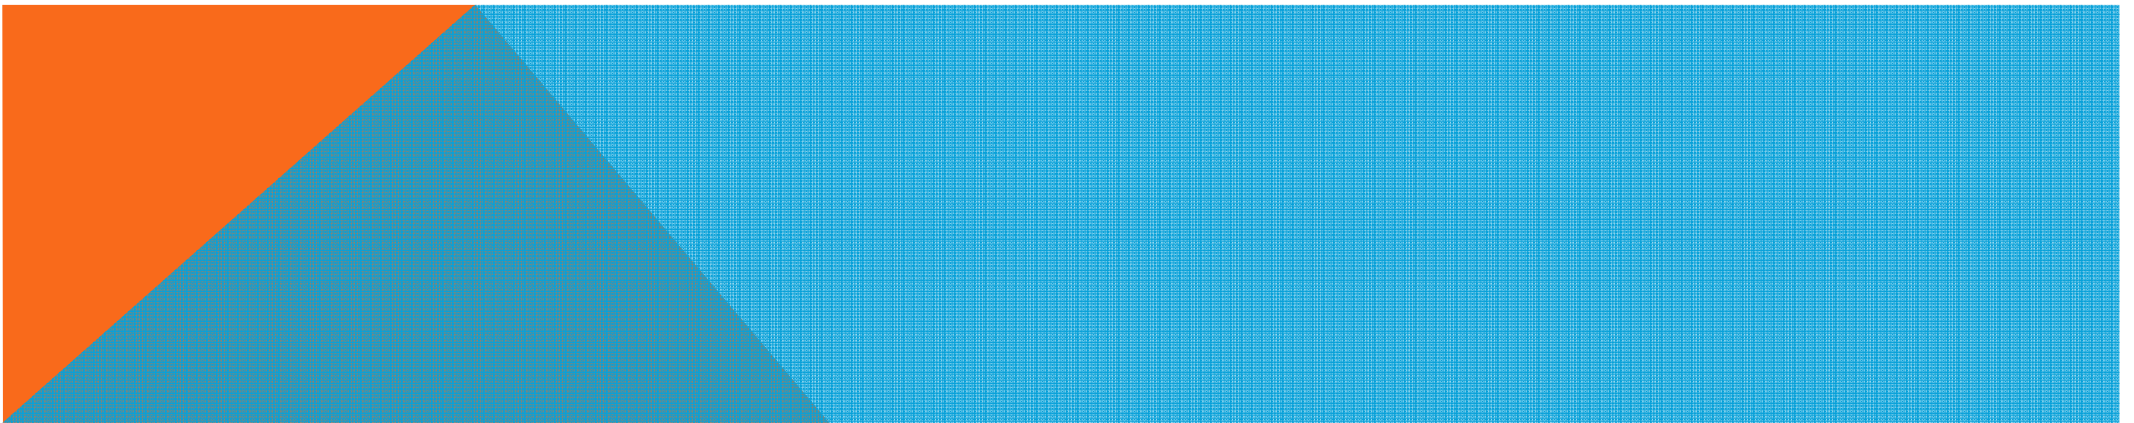

**Paradoxically, they represent themselves through their functionality**

# **FACULTY OF ARCHITECTURE**

**The building resembles a fortress and is intimidating**

**It fits to its strong belief in being the elite of the Technical University  
(mainly as its students are both technicians and artists)**

# TECHNICAL LIBRARY

**The technicality of the building has been converted into decoration**

- Floor
- Informative labels
- Etc.

**It depicts an effort present in the CZR nowadays to make the technical fields more popular**
